GO Enrichment Analysis:
DE vs FA Samples Across Conditions
Top activated and suppressed GO terms by adjusted p-value
Activated
Suppressed
Media Control, 1 Day Post-Exposure
Poly(I:C), 1 Day Post-Exposure
Poly(I:C), 1 Week Post-Exposure
Description
cytoplasmic translation
RNA splicing, via transesterification reactions
RNA splicing
ribonucleoprotein complex biogenesis
external encapsulating structure organization
extracellular matrix organization
extracellular structure organization
translation
cytoplasmic translation
cell-substrate junction assembly
focal adhesion assembly
cell-substrate junction organization
cellular response to growth factor stimulus
regulation of cell migration
response to growth factor
cell junction organization
mitochondrial ATP synthesis coupled electron transport
ATP synthesis coupled electron transport
respiratory electron transport chain
electron transport chain
oxidative phosphorylation
defense response to virus
antiviral innate immune response
response to virus
